

Empowering People

When people are empowered, they are more likely to do the right thing. They are more likely to act with compassion and make choices that lead to a healthier, more sustainable world. Unfortunately, when the opposite is true, people go out of their way to compromise their values. They'll even find someone else to blame, and do whatever they need to do to regain control of their basic needs.

When you think about a family living in poverty, it makes sense that all of their time and energy will be spent trying to meet their basic need for hunger, shelter and clothing. It also makes sense that if they are unable to meet their own needs, they may find someone else who can. This is where crime becomes the focal point, completely crowding out any possibility for serving the world and expressing their passion and creativity. We need Changemakers to help empower today's society!

Check out the opportunities listed below to see which careers interest you. Then do some research and start to find out what's required of you to get into that career field. Which college should you attend? Are there internships available? Is there a special school you should apply to? Where are these jobs located? Do you know any fellow Changemakers interested in these opportunities? Best of luck in your search!
